

Restores hidden skin tone
in just 14 days

#Brightening that elevates your tone

Excellent improvement results

A Clinical study of **Mitigation of Melasma**

A Clinical study of Pigmentation, **Skin Layer (Outer, Inner) Melanin**

A Clinical study of Pigmentation, **(Already Had) Uniformity in Melasma Area.**

A Clinical study of Melasma and **Pigmentation Area**

A Clinical study of Improvement of **Skin Brightness After Skin Coloring by External Stimulation**

No adverse reactions to **allergic contact dermatitis** or **irritable contact dermatitis** were observed after using test substances in the subjects

Test Item : MELA Brightening Serum, MELA Brightening Cream

Enzyme Snow Bubble Cleanser

100ml

It is a mild bubble cleansing foam containing plant-based amino acids and enzymes, which minimizes skin friction. Specially designed for sensitive and pigmented skin.

INGREDIENTS Galactoarabinan, Papain, Niacinamide, Tremella Fuciformis Sporocarp Extract, Glycerin

MELA Brightening Serum

30ml

DDC complex inhibits melanin production and balances the appearance of uneven pigmentation. It protects against pollution-induced dark spots, improves melasma, and prevents their re-appearance.

INGREDIENTS DDC complex, Aminopropyl Kojyl Phosphate, Glycerin, Niacinamide

MELA Brightening Cream

50ml

Day cream for hyperpigmentation inhibits the activity of tyrosinase and not only clarifies the skin tone with a tone-up effect but also restores the skin's natural luminosity and glooming. Specially designed for dull and irregular skin.

INGREDIENTS Niacinamide, Aminopropyl Kojyl Phosphate, Hexylresorcinol, Bakuchiol, Betaine, Calamine

MELA Tyroderm Cream

15ml

Advanced Pigment Corrector targets hyperpigmentation areas caused by accumulated sun exposure, hormonal shifts, and the natural aging process. It alleviates dead skin cells and improves skin radiance to reduce the appearance of discoloration.

INGREDIENTS Niacinamide, Aminopropyl Kojyl Phosphate, Tranexamic Acid, Hexylresorcinol, Glycerin

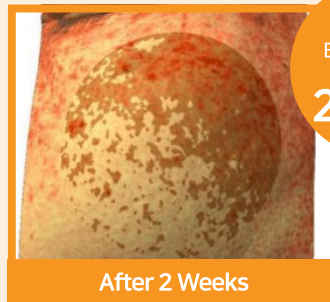

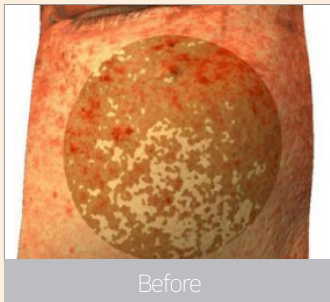

Limitless Luminosity by Erasing Pigmentation and Brightening Skin Tone

Brightens uneven skin tone by improving freckles and melanin both on the outside and inside of the skin

#Relieve 4 types of blemishes on the face

The authentic meaning of brightening is shown on the skin as the skin becomes clearer and brighter after **just 2 weeks**.

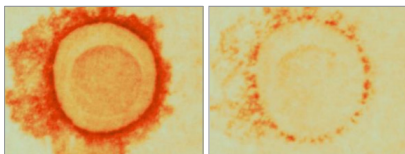

Blemish area reduced
22.33%

Improving skin luminosity after skin pigmentation due to external stimuli

Non-application area

40.83% ↑

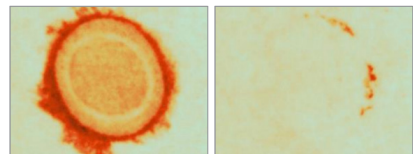

Improved in skin brightness
after 2 weeks of use

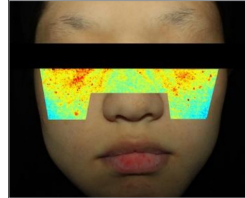

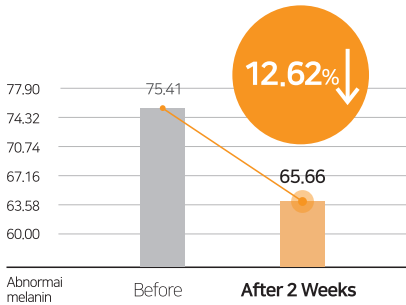

Application area

58.40% ↑

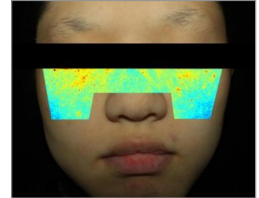

Improved in skin brightness
after 2 weeks of use

Clinical trials to alleviate freckles and pigmentation

Before

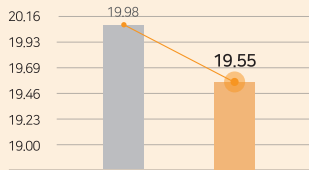

After 2 Weeks

Melanin on the skin surface and pigmentation

2.17% ↓

Reduced epidermal blemishes after 2 weeks of use

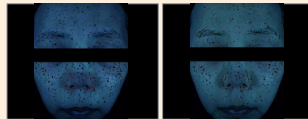

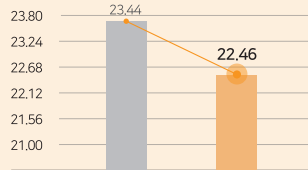

Before

After 2 Weeks

Before

After 2 Weeks

MELA Brightening evaluated by 22 clinical trial volunteers

Customer Satisfaction

100%

- ✓ It seems that freckles and pigmentation have faded.
- ✓ The visible spots and blemishes seem to have decreased.
- ✓ Skin that had darkened due to external stimuli seems to have brightened.
- ✓ Excessive pigmentation seems to have faded.
- ✓ It seems like the dark spots have disappeared.

tHermoCEUTICAL Skin Cares are Different.

Derma skin care should be distinctive

Dermatologist Approved

Multi

Angle

Multi

Age

Multi

Function

FDA-designated agency's official human efficacy clinical proof

Efficacy and Effect Validation

Increased Accuracy

Only cosmetics proven effective through human clinical trials can provide reliable results

Multi-item validation

Enhanced Reliability

From testing multiple factors for the same effect demonstrates the true reliability of the results

Multi-age,
Multi-gender validation

Enhanced Objectivity

Testing efficacy across a diverse range of ages (17 to 65) and genders for each factor yields highly objective results through average values

Accredited Clinical Institution

Increased Credibility

The official clinical trials conducted by the designated agency of the South Korean (KFDA), the Korea Institute of Dermatological Sciences, ensure high credibility

What choice will you make

EXO Regentron Anti-aging Solution

Exo Regentron, an anti-aging beauty solution born from the core mechanisms of 'exosomes' and bakuchiol, proven through human application trials.

MELA Brightening Brightening Solution

MELA Brightening line's solution and treatment, which provide definite assistance in preventing pigmentation and calming, will bring a new experience to pigment improvement.

MAX Hydra Plus+ Moisture Solution

The Hydra line goes beyond simple hydration by activating aquaporins, promoting filaggrin production, and preventing moisture loss through intercellular lipids and barrier-building ingredients to fortify the skin barrier.

DeAC Aciderm Acne Solution

The DeAC Aciderm line improves the environment of worsened acne-prone skin through the formation of a new concept of acne biome. It is developed to prevent deterioration due to irritation and to assist in achieving healthy, problematic skin.
